Summary

Strategy professional in insurance distribution who turns messy partner and sales problems into structured fixes: segmentation, payout redesign, revival programmes and the dashboards that track them. Owns a large B2B partner portfolio at InsuranceDekho, working with state and regional heads across India, and built an AI job-search system end to end with Claude Code, GitHub and Vercel. Earlier a top-performing consultative seller at Jaro Education. PGDM in Marketing & Strategy from Goa Institute of Management.

Experience

Sales Strategy | *InsuranceDekho, Gurugram* **Apr 2026 – Present**

- **Payout grid:** Flat payouts didn't reward partners' strongest product lines → restructured the grid by product line with sharper rates on each partner's top line and led insurer rate talks → +3% month-on-month incremental business on the ₹80 Cr/month B2B book.
- **Book growth:** A 13,000-partner book was held back by on-ground partner and sales pain points → resolved them and improved partner rates and margins → grew it from ₹50 Cr to ₹55 Cr a month in 6 months, then took over the 17,000-partner, ₹80 Cr book.
- **Partner revival:** 10,000 partners were inactive in a single month → ran a one-week revival contest that cost 1% in incentives against a 3% margin → ₹90L in business that week; separately won back 120 lapsed high-potential partners, adding ₹1.2 Cr/month.
- **Targeting:** Sales effort was spread over a 3.2-lakh partner database, 1.28 lakh of them inactive → cleaned it and cohorted 10K active partners by potential, premium and growth → focused calls, visits and case resolution on them, growing their business 4%.
- **Issue resolution:** 500 partners had stopped doing business over unresolved on-ground issues → set up a cross-functional issue-routing structure that closed 1,000+ issues → revived the 500 partners, adding ₹40L a month in incremental business to the portfolio.
- **Stakeholders:** Reporting work spanned 27 states and two entities (InsuranceDekho, RenewBuy) → own the monthly reporting charter with 70+ state and regional sales heads; hosted 110 top partners in Thailand and Goa (₹70L budget) → 10% post-trip growth.
- **Sales dashboard:** 1,500 salespeople had no live view of partner health and reporting was manual → built an AI-assisted partner-health dashboard and automated recurring reports and the 5-zone townhall deck → now used daily by 800+ salespeople, rated 4/5.

Pipeline Desk: AI job-search system | *Personal project (Claude Code, GitHub, Vercel)* **Oct 2026**

- **Problem:** ~30 one-click portal applications brought only rejections and fresh roles were found late → built Pipeline Desk, an AI job-search system, with Claude Code; code on GitHub, deployed on Vercel as a login-protected dashboard for 3 users.
- **Data:** Python pulls new roles from 39 company career boards (Greenhouse, Lever, Ashby, SmartRecruiters public APIs) plus public Indeed, Naukri and LinkedIn listings; reads Gmail to mark applications; a scheduled cloud agent refreshes it every 2 hours.

Senior Business Development Associate | *Jaro Education, Gurugram* **Jun 2022 – Jun 2023**

- **Revenue:** Sold online MBA programmes (₹1 Lakh+ ticket) to working professionals through consultative selling → closed 100+ deals worth ₹1 Cr, peaking at 23 enrolments in a month (a team benchmark); ₹70L of it financed via loans from partner NBFCs.
- **Recognition:** Achieved 115% of annual target with 100% quarterly attainment, a top performer in the Gurugram branch; won the National 'Sales Striker' Award (Q4) and 'Champ of the Month' twice, and earned a 2x fixed-pay hike within my first 12 months.

Sales & Marketing Intern | *Havells India Ltd* **May 2025 – Jun 2025**

- **Market entry:** Havells needed an entry case for BLDC fans → mapped 410 retail outlets across 11 clusters, surveyed the retailers and interviewed 7 distributors and 100 customers → found a 63% BLDC-fan coverage gap (111 of 174 target outlets).
- **GTM plan:** Uncovered outlets needed a conversion plan → presented cluster-level GTM plans to the Zonal Head → demo-fan placement at major outlets was adopted and 100 retail counters were picked for banner, pamphlet and catalogue visibility.

Skills

Strategy: Portfolio strategy, segmentation, payout and incentive design, GTM planning, stakeholder management
Tools: Excel, SQL, Claude Code, GitHub, Vercel, Google Workspace
